

The More You Know...

9 Key Benefits of DPF & Engine Cleaning with BAC101 and Hydrogen Cleaning.

Comprehensive Cleaning:

BAC101 effectively removes all four elements that block DPF filters: Carbon, Soot, Oil, and Ash.

Ash Removal:

BAC101 is unique in its ability to remove ash from DPF filters without causing damage.

Speed & Efficiency:

The entire DPF cleaning process with BAC101 usually takes less than two hours.

Ease of Use:

Hydrogen engine cleaners are incredibly user-friendly, simplifying the cleaning process for automotive professionals.

Plug & Play Operation:

Simple setup and operation require minimal technical expertise, saving time and reducing errors.

Hands-Free Operation:

The pulse drive module allows for automated cleaning, minimizing human intervention and ensuring consistent results.

Safe & Effective Cleaning:

Hydrogen gas effectively removes carbon deposits without damaging engine components.

Increased Engine Performance:

Removes carbon buildup, leading to smoother idling, better acceleration, and reduced engine noise.

Enhanced Fuel Efficiency:

By restoring engine efficiency, DPF & Hydrogen cleaning has been shown to improve fuel economy by 10-15%.

Making Engines Cleaner Using Science

Eliminating Engine Carbon Through Innovative Technology.

The company founders and the inventors of our technology worked tirelessly looking for a way to revolutionize the Hydrogen-based Engine Carbon Cleaning and DPF Cleaning markets. We have years of service experience using Hydrogen gas and our patented chemical process to clean DPF filters on thousands of diesel vehicles.

Our goal is to provide world class customer service and supply products that ease the pain of Fleet Owners, Shop Owners, and Technicians.

Improving Performance.

We offer cutting edge Hydrogen Generators producing 3400 - 4200 litres of Hydrogen gas per hour. Using the industries only Quad Pulse Technology, we deliver more Hydrogen gas through the entire combustion and exhaust systems allowing for a deeper clean. All of our machines operate at 110v power with no special electrical requirements. We have a proprietary line of the highest purity electrolyte to fuel the machines for optimal performance and cleaning of the electrolyzer cells.

DPF Filter Cleaning That Works Really Well!

Diesel Particulate Filter Cleaning.

Our BAC101 DPF 2-part cleaning products give the optimal results reducing Ash, Soot, Oil and Carbon buildup. Over four years, and 100 different formulas our dedicated team of engineers and designers developed formula #101! The result is BAC101, the worlds first DPF cleaning system that works on both gasoline and diesel vehicles to reduce emissions systems related costs and its best when used as a maintenance tool, cleaning your fleet, every six months to once per year based on how you operate your fleet.

We can eliminate all soot, ash, carbon and oil in every DPF filter system, you never have to remove your filter to clean it again, which means no more idle trucks, no more trucks in d-rate, fuel efficiency will rise and your operating costs will drop. Cleaning with BAC101 could not be simpler. With our innovative 2-part cleaning system you can finally remove all 4 elements of a blocked DPF filter, Carbon, Soot, Oil and ASH!

The Ultimate Engine & DPF Cleaning Service

Clean Your DPF At Our Shop.

Our 2-part cleaning products give the optimal DPF cleaning results reducing and eliminating Ash, Soot, Oil and Carbon buildup.

We can eliminate all soot, ash, carbon and oil in every DPF filter system, you never have to remove your filter to clean it again, which means no more idle trucks, no more trucks in d-rate, fuel efficiency will rise and your operating costs will drop.

Cleaning with BAC101 could not be simpler.

With our innovative 2-part cleaning system you can finally remove all 4 elements of a blocked DPF filter, Carbon, Soot, Oil and ASH! It is the only complete DPF cleaning solution on the market to-day.

Make your appointment today by calling us at 614-486-9603 we will clean your DPF and place you on our maintenance program, and we will put your DPF problems behind you.
